GloveUp™
BIODEGRADABLE GLOVES

Flourishing business the right way,
the eco-friendly way!

ABOUT US

SELLSAGE is a certified minority enterprise for eco-friendly products. We are driven with the passion of creating awareness of eco-friendly goods and making them accessible to the larger part of the world. With sustainability as our prime focus, all of our products have been mindfully selected with the goal of leaving the smallest carbon footprint for our planet. SellSage is actively making efforts at both the business and consumer levels to transform the world towards sustainable living.

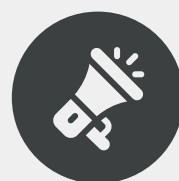

We believe...

Earth matters most

We keep sustainability as our prime focus during product development and sourcing

Awareness is key

We want to create awareness about how our choices impact the environment

Ethics first

We are driven by the moral code of serving our customers while safeguarding nature

We exist because of you

Sustainable choices made by our customers motivates us to deliver

No Powder

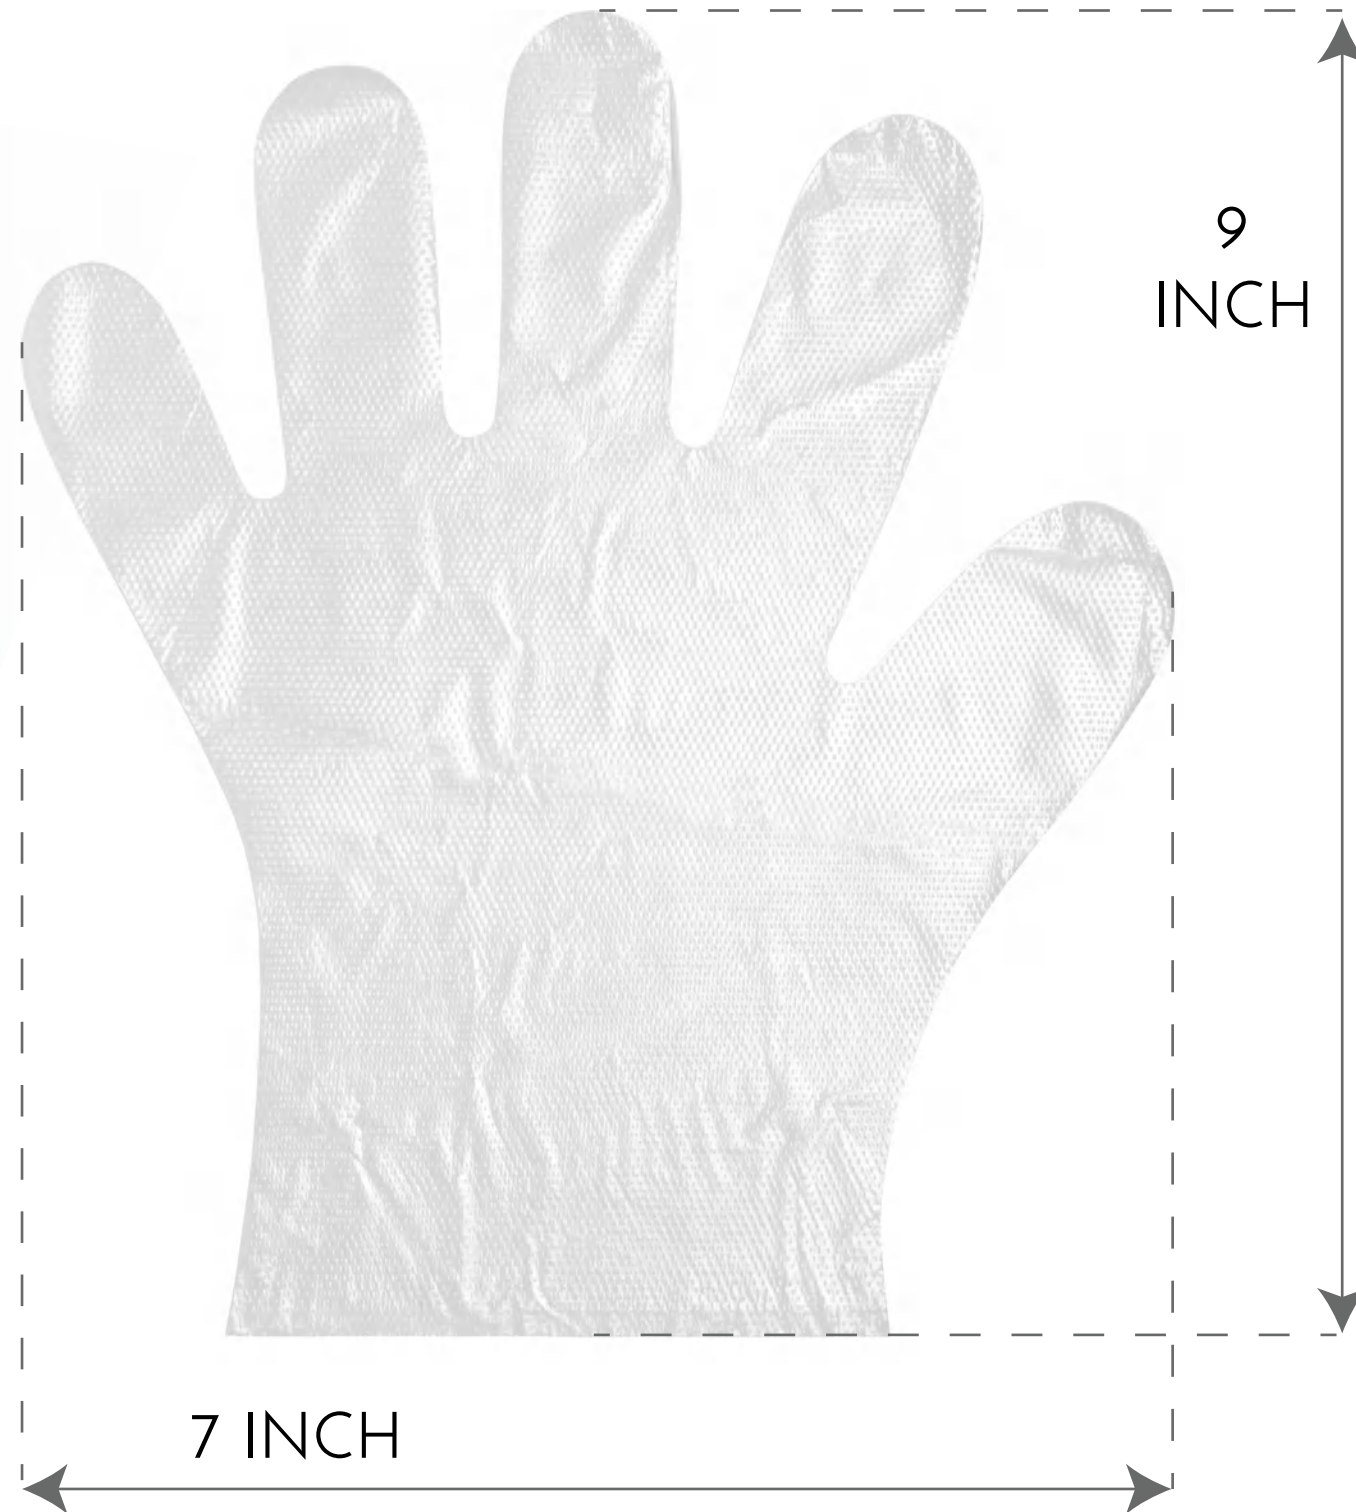

Food Safe,
Non-toxic

Tear & Leak
Resistant

GLOVE SIZE

GloveUp gloves are free size. They fit perfectly for most people

Designed and produced using next-generation Biopolymer Technology.
These plant-based biopolymers are developed and chemically engineered keeping environmental safety in mind because we believe that it is possible to lead a convenient lifestyle with minimal impact on the environment.

Our gloves have passed the ASTM 6400 (International) standards and are 100% certified compostable for commercial composting. As per these certifications, the composition of our glove material allows biodegrading to a minimum of 90%. The final product turns to biomass, water & CO₂ as a part of the degradation process.

COMMERCIALLY
COMPOSTABLE ONLY.
